Continuation of Substance of Interview including description of the general nature of what was discussed: In the applicant(s) response filed on February 28, 2007, the Examiner urged applicant(s) that the amendment to Claim 1, specifically the phrase of "at the same time" (lines 12-13) appeared to raise new matter, which would then warrant a rejection under 112, first paragraph. The examiner noted that the specification was not clear as to whether or not the second magnetic pole layer and the gap layer were both etched at the same time.

However, the examiner proposed a change to Claim 1 to remove these limitations from Claim 1, as well as clarify that a portion of the gap layer is what is removed. Furthermore, a minor change to Claim 4 was needed to correct a mere informality with the language.

The applicant(s) have agreed to all of the above changes, which are in the attached Examiner's Amendment, and now places the application in condition for allowance.
